CrossMark®

Test Summary

Project Name	83RR00J6TR
Benchmark Version	1.0.1.95
Completion Date	2026-10-07 10:59:39
Iterations	3
Scenarios Run	Productivity, Creativity, Responsiveness
Conditioning Run	True

Performance Scores

1454 Overall Score	1535 Productivity	1417 Creativity	1334 Responsiveness
Iteration 1	1516	1398	1303
Iteration 2	1566	1436	1368
Iteration 3	1522	1418	1332

BAPCo® Mission

Business Applications Performance Corporation (BAPCo) is a non-profit consortium with a charter to develop and distribute a set of objective performance benchmarks for personal computers based on popular computer applications and industry standard operating systems.

About The Calibration System

The calibration system is a system chosen as a reference point for all other CrossMark results. BAPCo chose the configuration above for its wide availability and its representation of a typical mainstream PC at the time of release of CrossMark.

CrossMark has been calibrated in such a way that a PC with performance equivalent to this calibration system for a given workload will have a performance rating of 1000. A system twice as fast as the calibration system on a given workload (or, equivalently, that responds in half the time on average) will have a performance rating of 2000. This is true for both overall ratings and scenario ratings.
