

## Test Summary

|                     |                     |
|---------------------|---------------------|
| Project Name        | project001          |
| Benchmark Version   | 1.0.1.48            |
| Completion Date     | 2019-10-16 12:16:04 |
| Iterations          | 3                   |
| System Conditioning | True                |
| Process Idle Tasks  | False               |

## Performance Scores

|                    | Productivity | Creativity  | Responsiveness | Overall Rating |
|--------------------|--------------|-------------|----------------|----------------|
| Scenario Rating    | 327          | 327         | 144            | 249            |
| Iteration 1        | 329          | 330         | 146            |                |
| Iteration 2        | 328          | 324         | 141            |                |
| Iteration 3        | 324          | 327         | 144            |                |
| <b>Calibration</b> | <b>1000</b>  | <b>1000</b> | <b>1000</b>    | <b>1000</b>    |

## System Information Comparison Table

| System Info | This System                 | Calibration System          |
|-------------|-----------------------------|-----------------------------|
| BIOS        | LENOVO 7XCN28WW, 10/26/2018 | Dell Inc. 1.7.7, 12/10/2017 |

### Core + Memory

|                  |                                                                                      |                                                                                      |
|------------------|--------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| Motherboard type | LNVNB161216                                                                          | 0WWJRX                                                                               |
| CPU              | Intel(R) Celeron(R) N4000 CPU @ 1.10GHz, 1101 Mhz, 2 Core(s), 2 Logical Processor(s) | Intel(R) Core(TM) i3-7100 CPU @ 3.90GHz, 3912 Mhz, 2 Core(s), 4 Logical Processor(s) |
| Memory Size      | 4.00 GB                                                                              | 4.00 GB                                                                              |
| Virtual Memory   | 5.20 GB Total, 4.16 GB Free                                                          | 5.24 GB Total, 3.80 GB Free                                                          |
| Virtualization   | Yes                                                                                  | Yes                                                                                  |
| Secure Boot      | Secure Boot StateOn                                                                  | Secure Boot StateOn                                                                  |

## **BAPCO® MISSION**

Business Applications Performance Corporation (BAPCo®) is a non-profit consortium with a charter to develop and distribute a set of objective performance benchmarks for personal computers based on popular computer applications and industry standard operating systems.

## **ABOUT THE CALIBRATION SYSTEM**

The calibration system is a system chosen as a reference point for all other SYSmark® 2018 results. BAPCo chose the configuration above for its wide availability and its representation of a typical mainstream PC at the time of release of SYSmark 2018.

SYSmark® has been calibrated in such a way that a PC with performance equivalent to this calibration system for a given workload will have a performance rating of 1000. A system twice as fast as the calibration system on a given workload (or, equivalently, that responds in half the time on average) will have a performance rating of 2000. This is true for both overall ratings and scenario ratings.
