

## Test Summary

|                     |                             |
|---------------------|-----------------------------|
| Project Name        | Acer EX215-53G-596E Sysmark |
| Benchmark Version   | 1.0.3.60                    |
| Completion Date     | 2021-07-04 09:48:42         |
| Iterations          | 3                           |
| System Conditioning | True                        |
| Process Idle Tasks  | False                       |

## Performance Scores

|                    | Productivity | Creativity  | Responsiveness | Overall Rating |
|--------------------|--------------|-------------|----------------|----------------|
| Scenario Rating    | 1101         | 1261        | 944            | 1094           |
| Iteration 1        | 1101         | 1267        | 968            |                |
| Iteration 2        | 1101         | 1258        | 980            |                |
| Iteration 3        | 1102         | 1256        | 884            |                |
| <b>Calibration</b> | <b>1000</b>  | <b>1000</b> | <b>1000</b>    | <b>1000</b>    |

## System Information Comparison Table

| System Info | This System                    | Calibration System          |
|-------------|--------------------------------|-----------------------------|
| BIOS        | Insyde Corp. V1.13, 10/15/2020 | Dell Inc. 1.7.7, 12/10/2017 |

### Core + Memory

|                  |                                                                                        |                                                                                      |

## **BAPCO® MISSION**

Business Applications Performance Corporation (BAPCo®) is a non-profit consortium with a charter to develop and distribute a set of objective performance benchmarks for personal computers based on popular computer applications and industry standard operating systems.

## **ABOUT THE CALIBRATION SYSTEM**

The calibration system is a system chosen as a reference point for all other SYSmark® 2018 results. BAPCo chose the configuration above for its wide availability and its representation of a typical mainstream PC at the time of release of SYSmark 2018.

SYSmark® has been calibrated in such a way that a PC with performance equivalent to this calibration system for a given workload will have a performance rating of 1000. A system twice as fast as the calibration system on a given workload (or, equivalently, that responds in half the time on average) will have a performance rating of 2000. This is true for both overall ratings and scenario ratings.
