

## Test Summary

|                     |                     |
|---------------------|---------------------|
| Project Name        | Huawei d15 i5       |
| Benchmark Version   | 1.0.3.60            |
| Completion Date     | 2022-07-28 22:54:19 |
| Iterations          | 3                   |
| System Conditioning | True                |
| Process Idle Tasks  | False               |

## Performance Scores

|                    | Productivity | Creativity  | Responsiveness | Overall Rating |
|--------------------|--------------|-------------|----------------|----------------|
| Scenario Rating    | 1290         | 1837        | 1224           | 1426           |
| Iteration 1        | 1287         | 1844        | 1242           |                |
| Iteration 2        | 1289         | 1846        | 1215           |                |
| Iteration 3        | 1293         | 1821        | 1214           |                |
| <b>Calibration</b> | <b>1000</b>  | <b>1000</b> | <b>1000</b>    | <b>1000</b>    |

## System Information Comparison Table

| System Info | This System            | Calibration System          |
|-------------|------------------------|-----------------------------|
| BIOS        | HUAWEI 2.19, 12/9/2021 | Dell Inc. 1.7.7, 12/10/2017 |

### Core + Memory

|                  |                                                                                             |                                                                                      |
|------------------|---------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| Motherboard type | BOD-WXX9-PCB-B4                                                                             | 0WWJRX                                                                               |
| CPU              | 11th Gen Intel(R) Core(TM) i5-1135G7 @ 2.40GHz, 2419 Mhz, 4 Core(s), 8 Logical Processor(s) | Intel(R) Core(TM) i3-7100 CPU @ 3.90GHz, 3912 Mhz, 2 Core(s), 4 Logical Processor(s) |
| Memory Size      | 8.00 GB                                                                                     | 4.00 GB                                                                              |
| Virtual Memory   | 9.68 GB Total, 6.65 GB Free                                                                 | 5.24 GB Total, 3.80 GB Free                                                          |
| Virtualization   | Enabled in hardware                                                                         | Enabled in firmware                                                                  |
| Secure Boot      | Secure Boot StateOn                                                                         | Secure Boot StateOn                                                                  |

## **BAPCO® MISSION**

Business Applications Performance Corporation (BAPCo®) is a non-profit consortium with a charter to develop and distribute a set of objective performance benchmarks for personal computers based on popular computer applications and industry standard operating systems.

## **ABOUT THE CALIBRATION SYSTEM**

The calibration system is a system chosen as a reference point for all other SYSmark® 2018 results. BAPCo chose the configuration above for its wide availability and its representation of a typical mainstream PC at the time of release of SYSmark 2018.

SYSmark® has been calibrated in such a way that a PC with performance equivalent to this calibration system for a given workload will have a performance rating of 1000. A system twice as fast as the calibration system on a given workload (or, equivalently, that responds in half the time on average) will have a performance rating of 2000. This is true for both overall ratings and scenario ratings.
